YES Training programme

TRAINING PROGRAMME

Excited to share with you the final version of our training programme. You may access it by clicking [HERE](#). Physical and online activities are available. The training program is divided into 3 categories, Empower, Engage and Connect

MEETING IN BITONTO

Partners gathered together in Bitonto, Italy for the 3rd Partners meeting on the 4th of April 2022. With cooperation and mutual work, all partners discussed the outcomes of the pilot activities that took place in Cyprus, Italy, Portugal, Sweden, and the United Kingdom. More than that they worked together to work on the ideas that young people developed during the pilot testing.

PILOT TESTING CYPRUS

During October 2021 PlanBe held the pilot testing of the project with the participation of 25 young people coming from different cultural backgrounds. Non formal education activities regarding social entrepreneurship were implemented. Participants were excited as they put in practice things they learned in the workshop and their ideas were heard on a safe space. .

PILOT TESTING UK

CCW implemented the Pilot Testing in Cardiff. During the activities, participants had the chance to get informed about the variety of activities that were offered by the training module of the project. More precisely they worked on their self esteem and self confidence. They received information on how to deal with problems and get knowledge on creative problem solving and alternative thinking

PILOT TESTING PORTUGAL

From 14-16 of January 2022, a Bootcamp of Active Citizenship for Youth was done in Cascais, Portugal with the collaboration of the local parish from Cascais-Estoril. Implementing Youth Engagement in Society Program (YES), we created an immersive experience where youth reflected on their role as citizens, their goals and what they could do for their local and European communities.

PILOT TESTING ITALY

The local piloting in Italy started in January 2022, in collaboration with 4 Associate partners who supported us in involving 11 NEET participants. For 5 weeks we implemented 5 workshops, focusing each of them on 2 modules of YES training programme, and selecting activities adapted to the group background and context of our implementation. Trainers and educators who follow the participants reported a relevant CHANGE in their attitude and behaviours after the training, especially referring to communication, relationship, intercultural competences, confidence, and emotional intelligence.

PILOT TESTING SWEDEN

Navigatorcentrum implemented the local pilot in Sweden during October and November 2021 with the 10 young participants of “Unga I Huset” (Youth in the house). They tested together 26 activities from the YES method book and had a lot of fun!. During the pilot they discussed opportunities to be more active citizens at both local and international level and they decided to volunteer together in a non-profit organisation called Erikshjälpen in the city of Östersund
